

- **6.5 years of relevant experience** in software design and development. | **M.Sc Computer Science**, McGill University.
- Relocating to Toronto, available from July.
- Programming languages - *Proficient*: Python, C++, Java | *Prior experience*: X10, MATLAB.
- Skills and interests: Compilers, data analytics, distributed computing, web backend systems.

WORK EXPERIENCE

INRO

Senior developer

December 2014 - present
Montreal, QC, Canada

- Contribute to research and development of **Emme** and **CityPhi**. Emme is a travel demand modelling system for transportation forecasting. CityPhi is a visual analytics software for large-scale spatial and mobility data.
- Built a new matrix calculator for Emme, **upto 30x faster and efficient on large matrices (over 1GB)**. Wrote a new expression parser, evaluator and memory management system. (Python and C++)
- **Data analytics for GTFS and travel smart-card data**: Developed techniques and tools to visually analyze and query public transit smart card data. These tools are used by clients to analyze and query things like loads, delays, and stop activities. (Python)
- Designed and developed **new Python API modules** for Emme's Fortran backend using Emme's macro language as interface.
- Designed and built Cityphi's **data import backend and API** to import geo and transport data from various formats like Shapefiles, OSM and GTFS. Also work on optimizing and extending the core data backend. (C++ and Python)

ISENCORE Technologies

CTO and co-founder

September 2013 - December 2014
Montreal, QC, Canada

- Developed the **3D object discretization** module for **Quirdity**, ISENCORE's 3D simulation engine. It generates a voxel tree and the associated data for a 3D model. (C++)(bit.ly/discretizer)
- Won **first prize** in the **McGill Dobson cup** 2014 startup competition.
- Delivered the **winning pitch** to get selected as **one of the 20 startups worldwide** to present at SLUSH 2014.

McGill University - Sable Compilers Research Lab

Research and Teaching

January 2012 - April 2014
Montreal, QC, Canada

- **Research Assistant, Sable Lab** - My research included program analysis and static compilation of dynamic languages.
 - Designed and developed **MiX10 : a MATLAB to X10 compiler for high-performance**, under **Prof. Laurie Hendren's** supervision and with direct inputs from the **X10 design team at the IBM T.J. Watson research center**. (Java)(bit.ly/getmix10)
 - Achieved **7 times (mean) faster** performance compared to the standard MATLAB implementation.
 - Discovered a **severe performance bottleneck** in the X10 compiler.
- **Teaching Assistant** - Program Analysis and Transformations, Compiler Design, and Introduction to Computer Systems.

Infosys Technologies Ltd.

Systems Engineer

September 2008 - August 2011
Pune, India

- **Led** a team of 4 for **deployment performance management** for AT&T's online and mobility frontend and backend applications.
 - My team's job was to design and develop performance test scripts, analyze results, and troubleshoot performance issues.
 - Worked on 8 projects and they all exceeded performance SLA under peak loads.

Sun Microsystems

Intern - Student Tech Lead, APAC region/Campus Ambassador

January 2007 - May 2008
Bangalore, India

- Promoted from being one of the **only 27 Campus Ambassador across India** to one of the **only 5 Tech Leads worldwide**.
 - **Taught** a course on OpenSolaris at the university. Conducted webinars and developed tutorials for ambassadors worldwide.

PUBLICATIONS

- Vineet Kumar and Laurie Hendren. **MiX10 : Compiling MATLAB to X10 for High Performance**. In Proceedings of the 2014 ACM International Conference on **Object Oriented Programming Systems Languages & Applications (OOPSLA '14)**.(bit.ly/1papr1)
- Vineet Kumar and Laurie Hendren. **First steps to compiling MATLAB to X10**. In Proceedings of the 2013 ACM SIGPLAN X10 Workshop, **X10 '13** co-located with **PLDI 2013**.(bit.ly/2papr2)

EDUCATION

McGill University

M.Sc. in Computer Science

April 2014
Montreal, QC, Canada

- Master's thesis reviewed as **"Excellent"** by the external reviewer.

SASTRA University

B.Tech. in Computer Science & Engineering

June 2008
Thanjavur, India

- Won the Dean's list scholarship for being among the **top 10%** students in the University.

OTHER PROJECTS

- Analysis to identify complex numerical values for MATLAB programs.(bit.ly/iscomplex)
 - Developed a language to express information propagation through library function calls.
- FreeMeLegal: An Open source license recommendation engine.(bit.ly/freemelegal)
