

- **Over 6.5 years** of relevant work experience. | **M.Sc Computer Science**, McGill University.
- **Relocating to Toronto**, available from July.
- Programming languages - *Proficient*: Python, C++, Java. | *Prior experience*: X10, MATLAB.
- Skills and interests: System software, data analytics, distributed computing, and web backend systems.

## WORK EXPERIENCE

### INRO

*Senior developer*

December 2014 - present

*Montreal, QC, Canada*

- Built a **new compiler and memory management system** for Emme's matrix calculator language. Emme is a travel demand modelling system for transportation forecasting, used by some of the world's most populous cities.
- Achieved **up to 30x faster** performance. Efficient even for computations on **large matrices (over 1 GB)**. (C++ and Python)
- Designed and developed **data analytics tools for public transit data**.
  - These tools are used by clients to visually analyze and query things like loads, delays, and stop activities. (Python)
- Wrote the **data import backend and API** for CityPhi, a visual analytics platform for large-scale spatial and mobility data.
  - Support for various geographical and transit data formats like shapefile, OSM and GTFS.
  - Optimized to handle large datasets by importing data only in specified spatial and/or time windows. (C++ and Python)

### ISENCORE Technologies

*CTO and co-founder*

September 2013 - December 2014

*Montreal, QC, Canada*

- Developed the **3D object discretization** module for Quirdity, ISENCORE's 3D simulation engine.
  - It generates a voxel tree and the associated data for a 3D model. (C++)([bit.ly/discretizer](http://bit.ly/discretizer))
- Won **first prize** in the **McGill Dobson cup** 2014 startup competition.
- Delivered the **winning pitch** to get selected as **one of the 20 startups worldwide** to present at SLUSH 2014.

### McGill University - Sable Compilers Research Lab

*Research and Teaching*

January 2012 - April 2014

*Montreal, QC, Canada*

- **Research Assistant, Sable Lab** - My research included program analysis and static compilation of dynamic languages.
  - Designed and developed **MiX10 : a MATLAB to X10 compiler for high-performance**, under **Prof. Laurie Hendren's** supervision and with direct inputs from the **X10 design team at the IBM T.J. Watson research center**. (Java)([bit.ly/getmix10](http://bit.ly/getmix10))
  - Achieved **7 times (mean) faster** performance compared to the standard MATLAB implementation.
  - Discovered a **severe performance bottleneck** in the X10 compiler.
- **Teaching Assistant** - Program Analysis and Transformations, Compiler Design, and Introduction to Computer Systems.

### Infosys Technologies Ltd.

*Systems Engineer*

September 2008 - August 2011

*Pune, India*

- **Led** a team of 4 for **deployment performance management** for AT&T's online and mobility frontend and backend applications.
  - My team's job was to design and develop performance test scripts, analyze results, and troubleshoot performance issues.
  - Worked on 8 projects and they all exceeded performance SLA under peak loads.

### Sun Microsystems

*Intern - Student Tech Lead, APAC region/Campus Ambassador*

January 2007 - May 2008

*Bangalore, India*

- Promoted from being one of the **only 27 Campus Ambassador across India** to one of the **only 5 Tech Leads worldwide**.
  - **Taught** a course on OpenSolaris at the university. Conducted webinars and developed tutorials for ambassadors worldwide.

## PUBLICATIONS

- Vineet Kumar and Laurie Hendren. **MiX10 : Compiling MATLAB to X10 for High Performance**. In Proceedings of the 2014 ACM International Conference on **Object Oriented Programming Systems Languages & Applications (OOPSLA '14)**.([bit.ly/1papr1](http://bit.ly/1papr1))
- Vineet Kumar and Laurie Hendren. **First steps to compiling MATLAB to X10**. In Proceedings of the 2013 ACM SIGPLAN X10 Workshop, **X10 '13** co-located with **PLDI 2013**.([bit.ly/2papr2](http://bit.ly/2papr2))

## EDUCATION

### McGill University

*M.Sc. in Computer Science*

April 2014

*Montreal, QC, Canada*

- Master's thesis reviewed as **"Excellent"** by the external reviewer.

### SASTRA University

*B.Tech. in Computer Science & Engineering*

June 2008

*Thanjavur, India*

- Won the Dean's list scholarship for being among the **top 10%** students in the University.

## OTHER PROJECTS

- Analysis to identify complex numerical values for MATLAB programs.([bit.ly/iscomplex](http://bit.ly/iscomplex))
  - Developed a language to express information propagation through library function calls.
- FreeMeLegal: An Open source license recommendation engine.([bit.ly/freemelegal](http://bit.ly/freemelegal))
